

## Waterbugs: Professional Development Session for River Detectives Educators, Daylesford 2018

In the lead up to the National Waterbug Blitz, Waterwatch Victoria's River Detectives program is hosting a professional development session for River Detectives Educators.

Join us, together with **John Gooderham** (ecologist and co-author of The Waterbug Book) to learn how fun and easy it is to deliver your own Waterbug Blitz session.

Learn how to collect and identify waterbugs, how to interpret your data using River Detectives methods and of course, how to deliver a FUN waterbug session.

Learning about freshwater ecosystems boosts understanding of STEM subjects. The program is an opportunity for accessible, scientific, hands-on, user-friendly learning for all ages and experience levels.

Collecting and assessing waterbugs is easier than you think! The data you collect with your class will contribute to the National Waterbug Blitz, so get register today!

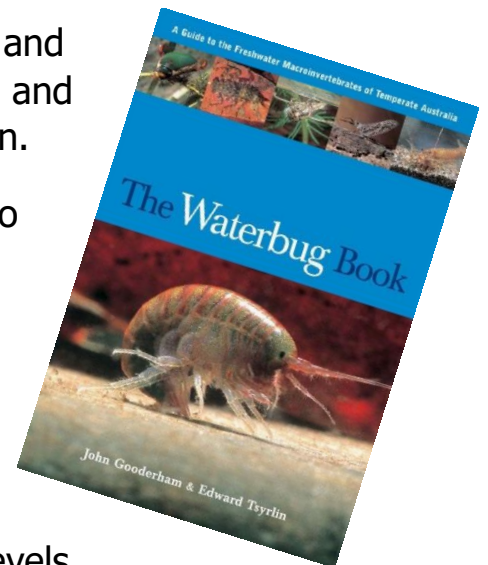

### **Daylesford Professional Development Session**

**When:** Wednesday 17th October 4:30pm to 6:30pm

**Where:** Tipperary Springs Park, Tipperary Spring Road, Daylesford (a map will be sent following registration)

This is a free event and includes a light supper.

Go to [waterbugblitz.org.au](http://waterbugblitz.org.au) for more info and resources.
