ANIMAL MATCHING GAME

Can you match up the animal with its features?

Answers on front page

1. Butterfly	A. My nickname is 'Stinker'. I can spray foul smelling liquid from my armpits and groin.
2. Diamond firetail	B. I am green with spots of gold, bronze or black. The inside of my thigh is turquoise blue.
3. Eastern long-neck turtle	C. I build a silk shell all around me and cover it with tiny bits of gravel, twigs, sand and pieces of plants. This protects my soft body as I move around looking for food.
4. Golden perch/yellowbelly	D. I'm boldly patterned in black, white, red, grey and brown. I eat mainly insects and grass seeds.
5. Backswimmer/ water boatman	E. I spend my childhood as a caterpillar and as an adult I eat nectar.
6. Caddis fly larvae	F. Long migrations are part of my life cycle, especially before spawning. I have been known to migrate more than 1,000kms.
7. Southern bell frog	G. I swim on my back. My hind legs are shaped like oars.
